

HPC Bulletin Long Track 167 Clarification – March 11, 2014

On pages 20 and 21 of HPC Bulletin 167 under the section 'Development Team Selection – 2014/2015 Season' it is indicated that 'The top ranked athletes per distance and gender from the 2013–2014 Canadian Ranking List not already selected to the National Team (including mass start)' will be selected to the Development team. The intention of this clause was to select the top ranked athlete on overall Canadian Ranking points to the National Development Team for all individual distances including mass start. The rationale for including the mass start event in team selections was that this event will be included in the World Single Distance Championships for 2015.

However, as there has not been a mass start ranking event completed yet this season (The mass start was cancelled at Canada Cup 3 due to adverse weather conditions), the HPC-LT has decided that the Mass Start will not be used for selection to the Development Team for the 2014/2015 season.
